

**PUERTO RICO
WATER RESOURCES AND ENVIRONMENTAL
RESEARCH INSTITUTE
REQUEST FOR PROPOSAL
FY 2024**

**U.S. Geological Survey
STATE WATER RESOURCES RESEARCH INSTITUTE
PROGRAM**

**under Section 104B of the
Water Resources Research Act of 1984, as Amended.**

**APPLICATION PACKAGE
CLOSING DATE: APRIL 1, 2024, 11:59 pm**

INTRODUCTION

This *Request for Proposals* (RFP) is issued under the provisions of section 104 of the Water Resources Research Act of 1984 (Public Law 98-242), as amended by Public Laws 101-397, 104-147, 106-374, and 109-471. Section 104 of the Water Resources Research Act directs the Secretary of the Interior to administer program grants to Institutes and Centers established under the provisions of section 104(a) of the Act for research, education, and training that will assist the Nation in augmenting its water-resources science and technology. The U.S. Geological Survey (USGS) is responsible for administering this program.

Research proposals submitted under this RFP are intended to address water resources problems of State and regional significance. The research priority areas for Puerto Rico are listed below. Proposals will not be considered in the following cases:

1. Proposals submitted by an applicant that has not met reporting requirements on a previous award by the U.S. Geological Survey (USGS) or P.R. Water Resources and Environmental Research Institute (PRWRERI).
2. Applications for research on health effects involving human subjects.
3. Applications for research involving oceanography (estuarine research applications are acceptable).

This document provides guidance to the academic community for the preparation of proposals for the Institute's annual research program with the U.S. Geological Survey. The procedure this year will be: (1) to request proposals, (2) to solicit evaluations by the Institute's External Advisory Committee (EAC) for relevance to the stated research priorities and technical contents, (3) to request a numerical rating of the proposals meeting the requirements of priority needs, and (4) selection of best proposals (number of proposals will depend on fund availability).

I. PROGRAM OBJECTIVES

Section 104(b) of the Water Resources Research Act of 1984 requires the Institutes or Centers to:

- (1) Plan, conduct, or otherwise arrange for competent applied and peer reviewed research that fosters – (A) improvements in water supply reliability; (B) the exploration of new ideas that address water problems or expand understanding of water and water-related phenomena; (C) the entry of new research scientists, engineers, and technicians into water resources fields; and (D) the dissemination of research results to water managers and the public."
- (2) "Cooperate closely with other colleges and universities in the State that have demonstrated capabilities for research, information dissemination, and graduate training in order to develop a statewide program designed to resolve State and regional water and related land problems."
- (3) The Act also requires each Institute to "cooperate closely with other institutes and other organizations in the region to increase the effectiveness of the institutes and for the purpose of promoting regional coordination."

Applications submitted under this Announcement are to be in furtherance of these objectives and promote the national mission and objectives of the U.S. Geological Survey, which are focused on providing water quality and quantity information, understanding water availability, addressing the influence of climate on water resources, and responding to water-related emerging needs. Specific areas of emphasis are at the discretion of the individual Institute or Center Directors.

II. PUERTO RICO WATER RESOURCES RESEARCH PRIORITIES

Research and technology transfer areas are:

1. **Research on Natural Disasters:** Effects of hurricanes, extreme rainfalls, earthquakes, or other natural hazards on natural resources, watershed hydrology, river morphology, water and wastewater treatment, water distribution infrastructure, landslides, and floods.
2. **Drinking Water Quality Research:** Fluoride as a health agent, control of Trihalomethanes and other disinfection byproducts, TMDL procedures and development, epidemiological studies of water-borne illness, and the effectiveness of water treatment processes.
3. **Climatologic Effects on Water Resources:** Climate changes and their effects on water resources, local and regional effects (the Antilles), modeling.
4. **Definition, Effects and Prediction of Droughts:** Optimization of water reservoirs and dams' operation during extreme dry periods, modeling of droughts, public perception, economic effects, prevention, and preparedness.
5. **Surface Water, Erosion, and Sediment Transport Studies:** Morphological studies on gravel and sand extraction and canalizations, urban runoff characterization, and river restoration. Causes, Characterization, control, and management of sedimentation in dams and water reservoirs. The innovative design of water intakes with sedimentation problems, control of sediment transport in construction projects, riverbanks, channel erosion, and local bridge scour.
6. **Water supply and Distribution Systems:** The impact of withdrawals on nearby water bodies, headwater protection, operation, and management by communities. Water losses in hydraulic networks, hydraulic modeling of water quality and quantity in distribution systems, pressure distribution, and water demand determination. Analysis and design of water distribution and water quality for NON-PRASA systems.
7. **Design of water treatment processes for private systems in small communities:** Design and construction of simple, economical, and easy-to-operate systems, disposition of treated water and its effects on effluents.
8. **Groundwater Research:** Availability of water, development of strategies for the north coast unconfined and artesian aquifers, optimization of water withdrawal from aquifers, the quantitative management plan for aquifers, saltwater intrusion, safe yield, pollutant transport, and flow modeling, development of new methodologies for groundwater treatment with high contents of iron and manganese.
9. **Recycling and Reuse of Used Water:** The use of wastewater for irrigation and artificial recharge, recycling of used water for human consumption, Characterization of wash flows from water treatment plant filters, and vulnerability of water bodies to assimilate used waters.
10. **Storm and Wastewater Infrastructure for Tropical Areas:** Design criteria for stormwater and wastewater drainage systems, energy losses, and manhole hydraulics.
11. **Watershed and Water Sources Management:** Includes conservation strategies, source protection, optimization of water sources, deforestation and reforestation, and riverine zones, among others.
12. **Aquatic Ecosystems:** Flow conditions (quantity, quality, etc.) for aquatic ecosystems support, use of aquatic communities as river quality indicators, ecosystem values and health, and others.
13. **Development of Education Programs:** Water conservation, water resources and environment protection.
14. **Programs and Strategies for Reforestation and Their Effects on Low Flows:** Changes in land management and their effects on low flows.
15. **Estuaries and Associated Wetlands:** Modeling of estuaries and associated wetlands, strip and mixing zones, hydrology and hydraulics, and water quality.
16. **Use of sinkholes in the north coast as drainage systems:** Disposal of street and highway runoff and water from other anthropogenic sources, hydraulics, intake capacity, and protection structures.
17. **Economic solutions to water problems:** implications on water quality, water scarcity, cost of water, human adaptation, and the environment.

III. APPLICANT ELIGIBILITY

Awards are available only to faculty members or affiliates at institutions of higher education in Puerto Rico under the provisions of Section 104 of the Water Resources Research Act of 1984, as amended.

IV. CONFLICT OF INTEREST

An applicant may not permit any federal employee to use their position for a purpose that is or gives the appearance of being in a conflict of interest, either by providing the applicant an unfair advantage or by a desire for private financial gain.

V. APPLICATION DUE DATE

The applicant shall submit its application to the P.R. Water Resources and Environmental Research Institute no later than **April 1, 2024, 11:59 pm**.

VI. PROPOSAL DELIVERY INSTRUCTIONS

Proposals must be delivered by email at prwreri@uprm.edu. Each application shall be prepared and submitted following the specific instructions provided in this RFP. The proposal must be submitted in M.S. Word Format using a 12-point font and single spacing. The exact format and content instructions can be found in section XII. APPLICATION INSTRUCTION.

Please note that the submission deadline for proposals is **April 1, 2024, 11:59 pm**. (Atlantic Standard Time). You may write the Institute to clarify these instructions at prwreri@uprm.edu or call 787-832-4040 ext. 5901.

VII. FUNDS

As of the date of this Announcement, federal funds have not yet been allocated for this program for F.Y. 2024. The Government's obligation under this program is contingent upon the availability of appropriated funds. The Puerto Rico Water Resources and Environmental Research Institute reserves the right to adjust these requirements in any way necessary to meet those of the U.S. Department of Interior and/or of the U.S. Geological Survey. Use the following numbers for this year's proposal:

- A. The maximum amount awarded in F.Y. 2024 is **\$22,000** annually per project.
- B. Proposals should be for research and information transfer projects 12 to 36 months and shall not request federal funding exceeding \$66,000 (\$22,000 per year).
- C. **Multiyear projects will be funded one year at a time.** Funding in subsequent years will be contingent upon the availability of funds and satisfactory performance. **There is no guarantee for funds availability and continuation of a project. A new proposal must be submitted for each subsequent year.**
- D. Projects begun with prior year funds may continue. **However, the possibility of granting a no-cost extension will be announced later this year. Spending all funds during the fiscal year of the project is highly recommended.** In case of a no-cost extension, a concise statement including data and analysis of research progress in the previously funded period, which demonstrate acceptable progress on the research project (not to exceed ten pages single-spaced), should be submitted within 30 days preceding the close of each 12-month budget period.
- E. **Matching Funds: – Matching funds of 1:1 is required.** If you have questions, please get in touch with PRWRERI at 787 832-4040 Ext—5901 or prwreri@upr.edu.

- F. The applicant's negotiated indirect cost rate (NICR) will be applied to federal costs. The NICR shall not be applied to tuition and equipment costs.
- G. The portion of benefits paid to individuals cannot exceed the proportion of their salaries paid from the grant.
- H. Federal funds shall not be used to pay indirect costs. The Geological Survey will accept indirect cost rates approved by the cognizant agency in accordance with 2 CFR 200: Uniform Guidance – Uniform Administrative Requirements, Cost Principles, and Audit Requirements.
- I. A copy of the approved rate agreement or other approving documentation must be attached to proposals from universities or colleges other than the University of Puerto Rico.

VIII. PROJECT DURATION

Projects may be from one to three years in duration; however, those projects with a duration longer than one year require approval for continuation of funding contingent upon (1) the continued availability of funds to the Institute and (2) a revised proposal that demonstrates satisfactory progress for the previous year toward meeting the project's stated objectives (3) USGS policy on the Program Administration. It is essential, therefore, that each year of multiyear projects stands by itself.

The project performance period will be **September 1, 2024, through August 31, 2025**. A short (2-4 pages) semi-annual report is required, and P.I.s will submit draft copies of completion reports to PRWRERI no later than **December 1, 2024**, for Institute review.

NOTE for applicants from institutions other than UPR-Mayaguez Campus (subawards)

Awards granted to institutions outside UPR-Mayaguez will sign a contract (Subaward) to bill for the project expenses. Administrative processing of a sub-award takes nearly two months after the project's start date. Applicants with this condition should know that the start and end dates of the project will be the same as the ones in this Announcement. The recipients must account for late start when executing the project.

IX. PROPOSAL REVIEW AND SELECTION PROCESS

1. Proposals will be received and sent for evaluation by the Institute's External Advisory Committee. The results of this evaluation will be forwarded to the Institute's director. A copy of the evaluation standard form is enclosed (Exhibit 1). The External Advisory Committee uses this form in its evaluation and ranking process.
2. Advised by these evaluations, the director will select the top proposals.

3. The following criteria apply:

Technical merit (quality)	40%
Applicability (importance)	30%
Novelty (new approaches)	10%
Competence of P.I.s	10%
Educational and training opportunities	10%

4. The tentative timeline will be as follows:

February 1, 2024	The Institute issues the Request for Proposals.
April 1, 2024	Proposals are due at the Institute Office (email submission).

April 9, 2024	Proposals evaluated by the Advisory Committee.
April 10, 2024	The local selection process was completed.
September 1, 2024	Projects begin (contingent on USGS approval).
February 3, 2025	Semi-annual report due in the Institute office.
October 31, 2025	Projects end.
November 3, 2025	Draft project completion reports due for Institute review.
November 10, 2025	The final version of the completion report is in the Institute office.
December 1, 2025	Annual program report submission to the USGS.

X. APPLICATION REQUIREMENTS

- A. The length of the project period shall not exceed three years, with discrete 12-month budget periods.
- B. The Institute will consider research proposals only from faculty members or affiliates at higher education institutions in Puerto Rico.
- C. The Institute shall not accept proposals from applicants who have not met reporting requirements for projects funded by a prior formula grant administered by the Department of the Interior.
- D. INDICATE WHETHER THE APPLICATION IS FOR A NEW OR CONTINUING PROJECT.

XI. APPLICATION CONTENTS

Each application shall consist of the

1) Project Proposal, including a Budget Breakdown (Exhibit 5) and Budget Justification (Exhibit 6).

Exhibit 5 (Budget Breakdown) and Exhibit 6 (Budget Justification) should be considered worksheets.

2) A **supplementary document of no more than four pages labeled "Data Management Plan" (DMP)**. This supplementary document should describe how the proposal will conform to USGS policy on disseminating and sharing research results and associated data. A valid DMP may include only the statement that no detailed plan is needed (e.g., "No data are expected to be produced from this project") if a clear justification accompanies the statement. This supplementary document may include:

- The types of data, samples, physical collections, software, curriculum materials, and other materials to be produced during the project.
- The standards to be used for data and metadata format and content (where existing standards are absent or deemed inadequate, this should be documented along with any proposed solutions or remedies);
- Policies for access and sharing include provisions for appropriate protection of privacy, confidentiality, security, intellectual property, or other rights or requirements.
- Provisions for reuse, re-distribution, and the production of derivatives; and
- Plans for archiving data, samples, and other research products and preservation of free public access to them.

Additional guidance on data management plans is available from the USGS Data Management website here:

<https://www.usgs.gov/products/data-and-tools/data-management/data-management-plans>

XII. APPLICATION INSTRUCTION

The contents of the application shall be prepared in accordance with the following instructions.

A. Research Proposals. (Includes research, education, information transfer, and information management system proposals.

Each proposal shall consist of 20 elements (see example in Exhibit 2).

1. Title. It is concise but descriptive.
2. Project Type. Choose from the following: Research, Information Transfer, Information Management System, Education, or Other (please specify).
3. Focus Categories. Choose a maximum of three focus categories from the list provided (see Exhibit 3), with the most preferred focus category first.
4. Research Category. Choose from the following the one category that most closely applies: Social Sciences, Groundwater Flow and Transport, Water Quality, Biological Sciences, Engineering, or Climate and Hydrologic Processes.
5. Keywords. Enter keywords of your choice that are descriptive of the work (see Exhibit 4).
6. Start Date. Enter the actual beginning date for the project.
7. End Date. Enter the estimated end date for the project.
8. Principal investigator(s). Provide the principal investigators' full name, academic rank, university, email address, and phone number.
9. Congressional District of the university where the work is to be conducted (see Exhibit 2).
10. Abstract. Provide a brief (one-page) description of the problem, methods, and objectives.
11. Budget Breakdown, as requested by Exhibit 5.
12. Budget Justification, as requested by Exhibit 6. Please provide enough details to demonstrate where your numbers arrived (see the **Budget Explanation** section below).

Item 13 must start a new page. Items 13 through 20 shall not exceed ten single-spaced pages - 12-point font, excluding curriculum vitae (C.V.s) (item 20). Before submission of your application, please verify compliance with the 10-page limit.

13. Title. Please use the same title as was entered in item 1 above.
14. Statement of regional or State water problem. Please include an explanation of the need for the project, who wants it, and why.
15. Statement of results or benefits. Specify the type of information that is to be gained and how it will be used.
16. Nature, scope, and objectives of the project. Include a timeline of activities.
17. Methods, procedures, and facilities. Provide enough information to permit evaluation of the technical adequacy of the approach to satisfy the objectives.
18. Related research (for research projects only). Show by literature and communication citations the similarities and dissimilarities of the proposed project to completed or ongoing work on the same topic.
19. Training potential. Estimate the number of graduate and undergraduate students, by degree level, who are expected to receive training in the project (see Exhibit 7).
20. Investigator's qualifications. Include a curriculum vitae (C.V.s) of the principal investigator(s). **No C.V.s shall exceed two pages or list more than 15 pertinent publications.**

B. Budget Breakdown. Submit a detailed budget as presented in the form of Exhibit 5. The budget shall include the line items given below. Indicate the amount of cost sharing for each element: If the applicant

proposes a project that is more than one year long, include lump sum costs for other years at the bottom of the form.

C. **Budget Explanation:** Submit a detailed description of each budget item. **Include calculations** on how your figures were arrived at and any information necessary to understand your budget (see Exhibit 6). The nonfederal portion of the budget must be detailed for each category.

1. Salaries and wages for P.I.s. Identify the individuals, title/position and categories of salaries and wages, estimated hours or percentage of time, and the rate of compensation proposed for everyone. If the rate of pay shown is higher than the current institution's rate of pay, include an explanation and justification.
 2. Salaries and Wages for Graduate Students. Provide personnel, title/position, estimated hours, and the proposed compensation rate for everyone. (Other forms of compensation paid as or instead of wages to students performing necessary work are allowable, provided that the other payments are reasonable compensation for the work performed and are conditioned explicitly upon the performance of essential work. Also, note that tuition has its category below and that health insurance, if provided, is to be included under fringe benefits.)
 3. Salaries and Wages for Undergraduate Students. Provide personnel, title/position, estimated hours, and the proposed compensation rate for everyone. (Other forms of compensation paid as or in place of wages to students performing necessary work are allowable, provided that the other payments are reasonable compensation for the work performed and are conditioned explicitly upon the performance of the required work. Also, note that tuition has its category below and that health insurance, if provided, is to be included under fringe benefits.)
 4. Salaries and Wages for Others. Provide personnel, title/position, estimated hours, and the proposed compensation rate for everyone.
 5. Fringe benefits (F.B.). Propose rates/amounts in conformance with normal accounting procedures. Explain the cost and the basis of the rate computations. Provide a breakdown of F.B. Include F.B. for P.I.s, Graduate Students, Undergraduate Students, and Others separately.
 6. Tuition. Provide rates and total proposed tuition separately for Graduate and Undergraduate Students.
 7. Supplies. Indicate the estimated amount for office, laboratory, computing, and field supplies separately. Provide a breakdown of the supplies in each category.
 8. Equipment. Identify non-expendable personal property with more than one year of useful life and an acquisition cost of more than \$5,000 per unit. If equipment fabrication is proposed, list the parts and materials required for each and show expenses separately from the other items. Furniture is not allowed. A detailed breakdown is required.
1. Services or consultant. Identify the specific tasks for which these services, consultants, or subcontracts would be used. Provide a detailed breakdown of the services or consultants, including personnel, time, salary, supplies, travel, etc.
 1. Travel. All estimated costs should be itemized, showing the number of trips required, the type of trip (field, scientific meeting, or conference attendance), the destination, the number of people traveling, the per diem and local reimbursement rates allowed by the applicant, and any miscellaneous expenses for each trip. (Note: All travel follows the established travel policy of the applicant's institution. A copy of the applicant's institutional travel policy may be attached). A breakdown should include location, personnel, number of days, per diem rate, lodging rate, mileage and mileage rate, and airfare (whatever is applicable).
 2. Other direct costs. Itemize the costs not included elsewhere, e.g., shipping, telemetry, computing, equipment use charges, age dating, publication costs, or other services. Provide breakdowns showing how the cost was estimated, e.g., computer time should show the type of computer, the estimated time of use, and the established rates.
 3. Indirect costs. Specify the indirect costs rate in the nonfederal column based on the applicant's

approved rate agreement. An amount equivalent to what the indirect costs would have been under the Federal portion may also be included as a match under the indirect cost in the nonfederal portion.

XIII. SPECIAL TERMS AND CONDITIONS

1. Adherence to reporting requirements. A recipient's failure to submit the required reports/documents on time may result in the withholding of payment, in the termination of the award, and/or in the delay or non-issuance of a new award.
2. Adherence to the Original Research Objectives and Budget Estimates. Any commitments or expenditures incurred by the Recipient more than the funds provided by this award shall be the responsibility of the Recipient. Expenditures incurred before the effective date of this award cannot be charged against the award's final funds unless provided for in this award.
3. Dissemination of Results. The Recipient is encouraged to disseminate research results promptly to the scientific community. The Institute urges the Recipient to publish project reports in scientific and technical journals. The Institute and the U.S. Government may publish, reproduce, and use all technical data developed because of this award in any manner and for any purpose, without limitation. They may authorize others to do the same.
4. Violation of Award Terms. Suppose the Recipient has materially failed to comply with the terms of this award. In that case, the Institute may suspend, terminate, or take other remedies legally available in the circumstances.
5. Budget changes are subject to approval by the Institute's Director and the USGS program manager. Pay attention to your budget distributions to avoid changes during the project period.

FY 2024 PROPOSAL EVALUATION FORM

Project Number: _____ Amount Requested: _____

Principal Investigator(s):

Title:

1. Is the water problem addressed significant? (30%) Score _____
(Excellent 30, Very Good 25, Good 20, Average 15, Fair 10, Poor 5, Unacceptable 0)

Comments:

2. Is the research proposal of high quality? (40%) Score _____
(Excellent 40, Very Good 34, Good 28, Average 22, Fair 15, Poor 8, Unacceptable 0)

Consider the following points in your evaluation (1) clarify of objectives, (2) methodology to conduct the research, and (3) reasonableness of the scope of the project for the time and budget allotted.

Comments:

2. Does the proposal contain new approaches?
or a novel solution to the water problem addressed? (10%) Score _____
(Excellent 10, Very Good 8, Good 6, Average 5, Fair 3, Poor 1, Unacceptable 0)

Comments:

PRWRERI Proposal Evaluation Form (continued)

4. Is the principal investigator and/or his research team?
qualified to carry out the proposed research? (10%) Score _____
(Excellent 10, Very Good 8, Good 6, Average 5, Fair 3, Poor 1, Unacceptable 0)

Comments:

5. Does the proposal make appropriate provision for the
training of future water resources professionals? (10%) Score _____
(Excellent 10, Very Good 8, Good 6, Average 5, Fair 3, Poor 1, Unacceptable 0)

Comments:

OVERALL EVALUATION (sum of section scores) Score _____

Fiscal Year: 2000 Principal Investigator: Project Title:			
Cost Category	Federal	Nonfederal	Grand Total
Total Salaries and Wages for:	\$19,713.00		\$19,713.00
Principal Investigator	\$2,625.00		\$2,625.00
Graduate Students	\$14,400.00		\$14,400.00
Undergrad Students	\$2,688.00		\$2,688.00
Total Fringe Benefits for:	\$313.00	\$0.00	\$313.00
Principal Investigator	\$275.00		\$275.00
Graduate Students	\$0.00		\$0.00
Undergrad Students	\$38.00		\$38.00
Tuition for:	\$0.00	\$0.00	\$0.00
Graduate Students	\$0.00		\$0.00
Undergrad Students	\$0.00		\$0.00
Supplies	\$1,200.00		\$1,200.00
Equipment	\$0.00		\$0.00
Services or Consultants	\$0.00		\$0.00
Travel	\$774.00		\$774.00
Other Direct Costs	\$0.00		\$0.00
Total Direct Costs:	\$22,000.00		\$22,000.00
Indirect Costs Federal		\$11,000.00	\$11,000.00
Indirect Costs Nonfederal		\$0.00	\$0.00
Amount Proposed	\$22,000.00	\$11,000.00	\$33,000.00
Total Costs at host Institute University	\$22,000.00	\$11,000.00	\$33,000.00
Total Costs at other university (name)	0	0	\$0.00

BUDGET JUSTIFICATION

Project Title: **Example Budget**

<p>Salaries and Wages for PIs. Provide personnel, title/position, estimated hours and the rate of compensation proposed for each individual.</p>
<p>J.D., Associate Professor and PI YR 1, 1 weeks of summer period: $(\\$94,500/9) \times (3/12) = \\$2,625,200$</p>
<p>Salaries and Wages for Graduate Students. Provide personnel, title/position, estimated hours and the rate of compensation proposed for each individual. (Other forms of compensation paid as or in lieu of wages to students performing necessary work are allowable provided that the other payments are reasonable compensation for the work performed and are conditioned explicitly upon the performance of necessary work. Also, note that tuition has its own category below and that health insurance, if provided, is to be included under fringe benefits.)</p>
<p>MS student, \$1,200/month during 12 months = \$14,400</p>
<p>Salaries and Wages for Undergraduate Students. Provide personnel, title/position, estimated hours and the rate of compensation proposed for each individual. (Other forms of compensation paid as or in lieu of wages to students performing necessary work are allowable provided that the other payments are reasonable compensation for the work performed and are conditioned explicitly upon the performance of necessary work. Also, note that tuition has its own category below and that health insurance, if provided, is to be included under fringe benefits.)</p>
<p>Undergraduate students: \$8/hr, 12 hr/wk during 28 weeks. Total \$2,688.</p>
<p>Salaries and Wages for Others. Provide personnel, title/position, estimated hours and the rate of compensation proposed for each individual.</p>
<p>None</p>
<p>Fringe Benefits for PIs. Provide the overall fringe benefit rate applicable to each category of employee proposed in the projects. Note: include health insurance here, if applicable.</p>
<p>Fringe benefits are calculated based on current rate 9.05% for faculty during summer period (\$275).</p>

Fringe Benefits for Graduate Students. Provide the overall fringe benefit rate applicable to each category of employee proposed in the projects. Note: include health insurance here, if applicable.
N/A
Fringe Benefits for Undergraduate Students. Provide the overall fringe benefit rate applicable to each category of employee proposed in the projects. Note: include health insurance here, if applicable.
1.4% for undergraduate students (\$38).
Fringe Benefits for Others. Provide the overall fringe benefit rate applicable to each category of employee proposed in the projects. Note: include health insurance here, if applicable.
NA
Tuition for Graduate Students. Provide time & amount. In-state or Out-of-state tuition?
None requested.
Tuition for Undergraduate Students. Provide time & amount. In-state or Out-of-state tuition?
None requested.
Supplies. Indicate separately the amounts proposed for laboratory and field supplies followed by a breakdown of the supplies in each category.
Total of \$1,200 braked down as: 1) Lab chemicals, reagents and media: \$800 2) Glass bottles and gloves: \$400
Equipment. Identify non-expendable personal property having a useful life of more than one (1) year and an acquisition cost of more than \$5,000 per unit. If fabrication of equipment is proposed, list parts and materials required for each, and show costs separately from the other

<p>items. A detailed breakdown is required.</p>
<p>Not requested.</p>
<p>Services or Consultants. Identify the specific tasks for which these services, consultants, or subcontracts would be used. Provide a detailed breakdown of the services or consultants to include personnel, time, salary, supplies, travel, etc. A breakdown is required for each cost.</p>
<p>N/A</p>
<p>Travel. Provide purpose and estimated cost for all travel. A breakdown should be provided to include location, number of personnel, number of days, per diem rate, lodging rate, mileage and mileage rate, airfare (whatever is applicable).</p>
<p>Partial support for one trip to the ASCE conference to present research results: Air plane ticket: \$776.</p>
<p>Other Direct Costs. Itemize costs not included elsewhere, including publication costs. Costs for services and consultants should be included and justified under "Services or Consultants" (above). Please provide a detailed breakdown for costs listed under this category.</p>
<p>Not Requested</p>
<p>Indirect Costs. Provide negotiated indirect ("Facilities and Administration") cost rate. If indirect costs are provided please include a copy of your current Indirect Cost Rate Agreement so the rate can be verified.</p>
<p>Indirect costs are 50% of the modified total direct cost not including equipment cost. $\\$22,000 \times 0.5 = \\$11,000$. Non-federal indirect cost = \$0.00</p>
